

**SECURED DELIVERY SYSTEM FOR UNATTENDED RECEIVING AND
SHIPPING OF PARCELS AND LETTERS**

ABSTRACT

5 In a secure delivery system (8) for unattended delivery of parcels and letters,
customer profile information (15) is accessed through a web page (18) to provide
a delivery service (12) with information for the location and code (17) to access a
tamper-proof enclosure (10). Tamper-proof enclosure (10) is linked to information
10 in the customer profile information (15). In addition, Tamper-proof enclosure (10)
is capable of sending a status message (19) through a transmitter (32) to a routing
hub (16) when deliveries are made.
